Network Working Group E. Westheimer Request for Comments: 235 BBN NIC: 7652 September 27, 1971

Obsoletes: None Updates: None

SITE STATUS

Beginning with this RFC, BBN will report on the status of most Network Hosts approximately once every two weeks. The information for these reports will be gained from talking to people at each site, and from experimental "data". These data will be the results of daily attempts to log into each of the Hosts which might be accessible to a Network user; the attempts will have been made from the BBN prototype Terminal IMP at a random time each weekday.

Several Hosts are currently excluded from the daily testing. These Hosts fall into two categories:

1) Hosts which are not expected to be functioning on the Network as servers (available for use from other sites) for at least a month. Included here are:

Network Address	Site	Computer	
71	Rand	PDP-10	
74	Lincoln	TX2	
11	Stanford	PDP-10	
13	Case	PDP-10	
14	Carnegie	PDP-10	
15	Paoli	B6500	

2) Hosts which are currently intended to be users only. Included here are the Terminal IMPs presently in the Network (AMES, MITRE, and BBN*). This category also includes the Network Control Center computer (Network Address 5) which is used solely for gathering statistics from the Network. Finally, included among these Hosts are the following:

Westheimer [Page 1]

Network Address	Site	Computer	
7	Rand	IBM-360	
73	Harvard	PDP-1	
12	Illinois	PDP-11	

The tables on the next two pages condense the information on Host status for September 13 through September 24.

WE/jm

Westheimer [Page 2]

^{*} The BBN Terminal IMP (Network Address 158) is a prototype, and as such is frequently not connected to the Network, but being used to refine and debug the Terminal IMP programs.

NETWORK ADDRESS	SITE	COMPUTER	STATUS OR PREDICTION	CONTRACT
1	UCLA	SIGMA-7	Server	John Postel
65	UCLA	IBM-360	Remote Job Service now,	
				Steve Wolf John Melvin Len Chaiten Jim White Barry Wessler Alex McKenzie Dan Murphy Mike Padlipsky Bob Bressler Eric Harslem Eric Harslem Bob Long Bob Sundberg Bob Sundberg Joel Winnet Tom Barklow Andy Moorer John Cravits Charles Rose Hal Van Zoeren

where

D = Dead. (Destination Host either dead or inaccessible (due to network partitioning or local IMP failure from the BBN Terminal IMP)

R = Refused. (Destination Host returned a CLS to the initial RFC.)

T = Timed out. (Destination Host did not responding any way to the initial RFC, although not dead.)

1/2 0 = 1/2 Open. (Destination Host opened a connection but then either immediately closed it, or did not respond any further.)

Westheimer [Page 4]

0 = Open. (Destination Host opened a connection and was accessible to users.

* The UCLA IBM-360 is at the moment only able to handle Remote Job Service. BBN is not equipped to test this, but is assuming that receipt of their canned message indicates that RJS is also functioning.

[This RFC was put into machine readable form for entry] [into the online RFC archives by Kelly Tardif, Viagénie 10/99]
